G2A ARENA - SPACE OPEN FOR BUSINESS!

G2A Arena is the biggest modern convention and exhibition center in the Podkarpackie voivodeship. It’s an impressive sight to behold and has been the business heart of the whole region since 2016. The G2A Arena Convention and Exhibition Centre of the Podkarpackie Voivodeship hosts the biggest trade shows, multinational congresses, and conferences in the whole voivodeship. The facility cooperates, hosts, patronizes and supports countless events. G2A Arena has been a host for conferences and congresses, exhibitions, cultural and sports events on local, national or even multinational scale. Throughout two years of activity, the Centre has become the most important congress and exhibition facility, as well as an architectonic and business icon of the region.

Its modern glass building, built in a futuristic style and with 28 thousand square meters of space, is the first sight that passengers leaving the Airport Rzeszów-Jasionka can behold. It is a symbol, a monument to innovation and the multi-dimensional development of the Podkarpackie voivodeship and at the same time the heart of local business life and the most important convention and exhibition center in south-east Poland. The vast possibilities it offers allows events to be organized in multiple ways. Thanks to the facility's high functionality and architectural values the event schedule is always full for the whole year.

G2A Arena’s main goal is to support business and autonomy as well as to promote the attributes of the Podkarpackie voivodeship, such as aircraft, cosmonautics, computer science, motorization and life standards. Being part of the Podkarpackie Science and Technology Park AEROPOLIS naturally supports its business life as well as neighboring institutions. In Jasionka investors can meet with politicians and build relations with European or even worldwide companies. In this way local businesses can make contact with national and multinational businesses, allowing them to cross boundaries, both mental and physical. Statistics confirm the importance of the Centre as over 100 thousand guests, from which approximately 1000 are exhibitioners, attend approximately 130 events during a year. It was here that events such as Aerospace&Defence Meetings Central Europe, European Robotic Congress, Science Festival, EKO Gala, Fly&More Congress, trade shows: CaprathiaHunting&Forestry, Home Design, Garden Expo and many more took place. All sorts of novelties and premieres are presented during brand events that G2A Arena also hosts. The biggest congress and exhibition halls in all of Podkarpacie, as well as 12 smaller conference halls host meetings of business leaders who gather to make key decisions regarding the future of their companies.
Looking back, it’s safe to say that our facility has become a bridge between Podkarpacie and the rest of the world, a place that not only connects all business life from the region but provides a great opportunity for investors from the entire country to create a network. We have had guests from over 40 countries. The subjects discussed during the events regard national and multinational affairs. Congress 590, European-Ukraine Forum, European Agriculture Forum, 60 million Congress and Business Without Limits Congress are some of the many events hosted by the G2A Arena, which not only bring fame to the facility but also promote business, culture and the tourist attributes of the region.

The power of conversation – this is the idea that guides the Centre. The primary goal of organized events is to connect people, and the high statistics confirm that this goal is achieved. Thanks to G2A our guests learn about Podkarpacie and are amazed at how the city of Rzeszów and all of the voivodeship for that matter has changed. People stopped associating Podkarpacie with the second rate and began to think of it as an IT area. The experts predict that Aviation Valley, located in the area, can become the Polish Silicon Valley. More and more often the Podkarpackie voivodeship is considered a good place for investment and its business properties are the subject of debates during various events.
